

Youssef Ashraf ElNaggar

DevOps & Cloud Infrastructure Engineer

✉ youssef.ashraf.elnaggar@gmail.com ☎ 01026735485 📍 6th October, Giza, Egypt 🔗 linkedin 🐙 Github
📅 Concluding Dec 1, 2026 (Available for Immediate Full-Time Employment) 📁 Portfolio

Experience

- DevOps Engineer Intern, Valeo** 07/2024 – 09/2024
Cairo, Egypt
- Automated multi-OS Docker image builds and CI workflows using Bash, Python, and Jenkins, slashing manual intervention by 40%.
 - Maintained persistent, secure SSH connectivity across 200+ machines, resolving deployment dropouts and system accessibility bottlenecks.
 - Automated Git version upgrades across CI nodes and synchronized artifact management in Nexus via Ansible playbooks, decreasing repository sync errors by 80%.
 - Standardized CI environment roles and variable auditing using Ansible, boosting debugging and triage efficiency by 50%.
- DevOps Engineer Intern, STEM Entrepreneurship Center** 03/2025 – 05/2025
Cairo, Egypt
- Containerized multi-service applications using Docker and automated deployment pipelines with Jenkins.
 - Conducted practical workshops and technical mentorship on container best practices, Git branching strategies, and CI/CD pipelines.
- Software & Process Automation Intern, Valeo** 08/2023 – 09/2023
Cairo, Egypt
- Automated internal project management reports and analytics dashboards using JavaScript / Google Apps Script, reducing manual reporting overhead by 60%.
 - Built visual analytical tracking models (gauge & pie charts), saving team leads 4+ hours per week on manual calculations.

Projects

- Workplace Assessment & Live Proctoring Platform (Client: Mofarreh Group)** 09/2026 – 09/2026
- Architected and deployed a production assessment platform with real-time Socket.IO supervisor auditing, server-side exam scoring, and anti-cheat tab-blur monitoring.
 - Built webcam proctoring with MediaRecorder and IndexedDB chunk buffering; containerized React 19 & Express with multi-stage Alpine Docker, deployed to Railway with Sentry APM.
- AI-driven Energy Optimization Framework** 10/2024 – 06/2025
- Built and containerized the scalable Python backend processing IDF design files, 2D/3D visualizations, and RAG/LLM pipelines with Docker, ensuring consistent multi-developer environments. Automated end-to-end CI/CD via GitHub Actions and deployed microservice APIs to Google Cloud Run, delivering zero-downtime rollouts and secure ingress critical for live platform operations.
- Hybrid Multi-Tier & Microservices Deployment** 03/2025 – 05/2025
- Containerized a microservices bookstore with Docker and deployed onto AWS EKS (Kubernetes); provisioned cloud infrastructure with Terraform.
 - Configured Jenkins CI/CD on EC2 via Ansible playbooks, secured secrets with KubeSeal, and set up Prometheus & Grafana observability.
- High-Performance Go Microservice with Redis & Kubernetes** 02/2025 – 02/2025
- Optimized a Go-Redis application with Docker and Kubernetes, reducing image size by 97.5% (1GB → 24.5MB) and configuring StatefulSets, PVCs, ConfigMaps, and NodePort services for persistent caching.

Education

- Bachelor of Information Technology and Computer Science, Nile University** Fresh Graduate
Cairo, Egypt
- Cumulative GPA: 3.95 / 4.00 (Graduated with Highest Honors / Excellence)**
 - Graduation Project:** Grade: Excellent | Class of 2025

Technical Skills

- Cloud & Infrastructure:** AWS (EC2, EKS, S3, IAM), Google Cloud Platform (Cloud Run), Docker, Docker Compose, Kubernetes (K8s), Terraform, Ansible
- CI/CD & Automation:** Jenkins, GitHub Actions, Linux Administration (Ubuntu/Alpine), Bash Scripting, Git, Nexus
- Observability & Reliability:** Prometheus, Grafana, Sentry APM, ELK Stack, Metric Collection
- Programming & Scripting:** Python, Bash, Go (Golang), TypeScript, JavaScript, SQL, C++
- Databases & Caching:** PostgreSQL, Redis, SQLite, Prisma ORM

Courses

- DevOps Training, DEPI program (MCIT)** 10/2024 – 05/2025
Giza, Egypt
- Hands-on training in AWS, Docker, Kubernetes, Ansible, Terraform, Jenkins, and Prometheus/Grafana
- Fundamentals of DevOps, KodeKloud** 02/2025 – 02/2025
- Built a strong foundation in DevOps principles, automation, LEAN practices, and key metrics for efficient collaboration and transformation.
